

Oil Refresher

PRODUCT FEATURES

- Wood floor soap for 1 component oiled floors
- Re-oiling property, refreshes the oiled surface
- Makes 1 component oiled floors more resistant to wear and prolongs the intervals between maintenance procedures
- Recommended maintenance after every 5th cleaning with Arboritec Cleaner
- Available in white and natural

PREPARATION

The floor must be free from contamination and dust. Clean with Arboritec Cleaner.

APPLICATION

Dilute Arboritec Oil Refresher with cold water (max 20°C) as per directions below. Wipe the floor with a clean, damp mop. Do not rinse the floor with water afterwards.

After treating an oiled floor with Refresher the surface may appear matt. It can easily be polished up with a dry cotton cloth.

NB: Never pour water directly onto oiled wooden floors, instead use a damp cloth or floor mop and remove excess water immediately.

FREQUENCY OF USE

To maintain the look and the protective properties of floor oil, we recommend using Arboritec Oil Refresher instead of Arboritec Cleaner every fifth clean.

If treatment with Arboritec Oil Refresher no longer gives the desired effect, the floor can be treated with Arboritec Satin Maintenance Oil.

CLEANING

Clean tools with warm water.

HEALTH AND ENVIRONMENT

Use the normal due care when handling chemical products. Ensure good ventilation. Use protective goggles and gloves if there is any risk of splashing. If the product comes into contact with your skin, wash it off with soap and water. If the product gets into your eyes, rinse with a generous amount of water. For further information see Safety Data Sheet.
