Refresher

PREPARATION

The floor must be free from contamination and dust. Clean with Arboritec Cleaner. Any residual polish or grease must be carefully removed with Arboritec Polish Remover and a sanding screen grit 120.

APPLICATION

Pour Arboritec Refresher directly onto the floor from the can. Disperse the refresher with a clean, damp mop or lint-free cloth. Do not dilute the refresher. Let dry for about 1 hour. After that the floor is ready to use. If streaks appear it is likely that the floor has been treated with either polish or wax. In that case it has to be cleaned with Arboritec Polish Remover and sanded with a sanding screen grit 120.

FREQUENCY OF USE

To maintain the look and the protective properties of the lacquer, we recommend an application of Arboritec Refresher after every fifth clean with Arboritec Cleaner.

CLEANING

Clean tools with water, before the refresher has dried.

ENVIRONMENTAL

Use the normal due care when handling chemical products. Use protective goggles and gloves if there is any risk of splashing. If the product comes into contact with your skin, wash it off with soap and water. If the product gets into your eyes, rinse with a generous amount of water. For further information see Safety Data Sheet.
